## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 16-33 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Re- Claim 16: The prior art does not disclose flaps having rounded leading edges. The prior art further does not disclose the capability of reducing vortex and airflow separation in all controllable flap positions.

Re – Claim 30: The prior art does not disclose identical cross-sectional configurations in the form of wedge-shaped flaps having rounded leading edges. It would not be obvious to make the shape identical because there is no motivation to do so. No reference in the prior art uses identical flap shapes in the manner that applicant has claimed and any suggestion to alter the shapes so that they would be identical would be based on improper hindsight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Drawings***

3. The drawings filed on 3/29/2004 are accepted.

***Election/Restrictions***

4. The restriction requirement has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.**

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
